

CSCI 1170 Assignment-1 Planning

Purpose and Goals: This will be a personal portfolio website, the purpose of which would be to showcase not only my achievements and experiences to potential employers and highlight my strengths but also my creativity and skill with the process of creating the website itself. Apart from looking good and containing a website form of my resume it would have links to my social profiles and contact information along with links to github repositories showcasing my work or projects and access to other work samples.

Design: The design will be clean and simple with a focus on the “portfolio website” theme. The navigation would be in the form of a navigation bar at the top and, further down development, the colour scheme would likely reflect discord dark theme or atom one dark pro theme with a switch for those who prefer light theme

Layout:

About me page: This would likely be the index.html/ home page which would contain a writeup of who i am professionally and as a person, my personal interests and my professional skills along with the professional goals i am currently working on. This page would also include my education and the courses I am taking or have been taking at college or online. At the end of the page would be the option of finding out more which would redirect to another page called “My work and skills” which would also have a link in the nav bar.

My work and skills: here I would document my professionally relevant work, in this case links to software projects and would rate my proficiency in various programming languages and frameworks with a link to my resume at the bottom of the page. Links to my personal projects would be accompanied by gifs or pictures of them.

Gallery: Here i would put pictures and posts from various hackathons and events that I attend or clips from different professional experiences i was a part of such as conferences or expos

My Recommendations/Favorites: A personal touch to the website where I would talk about my favourite books, music, tv shows and movies.

Contact me: this would contain links to my social media profiles as well as a textbox where anyone could write an email and the backend would send it to my actual email through maybe an email service or an email bot

Hire Me: a page with my degree schedule, divided semester-wise between work term and study term so that potential employers may know when to expect to be working with me
